

Big Business Features for a Small Business Price

TalkSwitch systems are available from 2 lines / 4 exts. to 16 lines / 32 exts.

Includes 'Always Connected' Remote Extensions,

Works with your existing phone equipment.

Do-It-Yourself System Configuration

TalkSwitch works with the TS100 phone, and 3rd party phones, cell phones, cordless phones and analog devices.

Finally there is a telephone system that makes big business phone features truly affordable for the small business. The TalkSwitch system by Centrepont includes built-in auto-attendants, voicemail, and many other features that help small businesses achieve success. Join thousands of small businesses and home offices that have chosen Centrepont's award-winning phone systems. Manage your company's growth, project a professional image, and stay connected everywhere.

All-In-One Phone System

Everything you need is built in - a powerful package of flexible telephone features including voicemail and auto attendants.

Installation is a Snap

The compact TalkSwitch typically installs in less than 60 minutes and is remarkably easy to use.

'Always Connected' Remote Extensions

You can have the same phone features out of the office as in the office! Calls to the office can be transferred to any remote phone (home phone, branch office, cell phone, pager). Calls received remotely can be answered, sent to voicemail, or seamlessly transferred back to any office or remote extension.*

Grows with Your Business

The TalkSwitch is incredibly easy and cost effective to expand - up to 16 lines and 32 extensions! Simply connect additional units using standard Ethernet cable.

Reduce Communication Costs

Unlike other PBXs, the TalkSwitch is designed to be entirely user-configurable. Customers can do their own setup, and perform future moves and changes. Use affordable analog phones and avoid costly proprietary sets.

With TalkSwitch, You Have a Choice

Use it as a standalone PBX. Use the built-in LAN port and move voice traffic over your network. Later, evolve your system to do Internet telephony.

* Version 2.39 and higher

TalkSwitch modules can be networked via the LAN to reach 16 lines and 32 extensions

Get the Best System Today ... and Tomorrow

It is sensible for small businesses to choose a system with the features and capacity required today, while at the same time prepare for future growth. TalkSwitch's unique modular design enables you to purchase a remarkably affordable phone system today. You can expand the TalkSwitch up to 16 lines and 32 local extensions, while retaining your initial investment.

As the company grows, up to four (4) TalkSwitch units can be easily connected via a LAN.

System	Lines In	Local Ext.	Remote Ext.
2 x 4	2	4	8
4 x 8	4	8	8
8 x 16	8	16	16
12 x 24	12	24	24
16 x 32	16	32	32

Equip your mobile warriors and teleworkers with TalkSwitch's unique 'Always Connected' Remote extensions.
